DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23, drawn to fluid delivery device having a threaded lead screw in the reservoir, classified in class 604, subclass 155.
- II. Claims 24, drawn to a fluid delivery device having a plunger shaft incompressible along an axis and bendable transverse to the axis, classified in class 604, subclass 151.
- III. Claims 25-48, drawn to a fluid delivery device having a wireless receiver, classified in class 604, subclass 131.
- IV. Claims 49-50, drawn to a fluid delivery device having a wireless transmitter, classified in class 604, subclass 93.01.
- V. Claim 50, drawn to a system for delivering fluid to a patient, classified in class 604, subclass 890.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the inventions have separate utility such as not requiring the particular elements of the other inventions. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention: species 1 drawn to fig. 3, species 2 drawn to fig. 5a, species 3 drawn to fig. 5b, species 4 drawn to fig. 6, species 5 drawn to fig. 8, species 6 drawn to fig. 9, species 7 drawn to fig. 10, species 8 drawn to fig. 11, species 9 drawn to fig. 12, species 10 drawn to figs. 13a,b, species 11 drawn to figs. 18a,b, species 12 drawn to fig. 19, species 13 drawn to fig. 20.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 3763

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Hayes at (703) 305-5873. The examiner can usually be reached Monday -Thursday, 7:00-4:30, and on alternate Fridays. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler, can be contacted at (703) 308-3552. The fax number for submitting official papers is (703) 872-9302. The fax number for submitting after final papers is (703) 872-9303.
